

Session summary

First of all we would like to thank you for joining us again in the second phase of the F1 2020 edition of our division. We hope you will enjoy this next season as much as we are managing it.

This first race was a good one for most. Some had some disappointments but in general there was good racing. Lot of respects shown. For example between **Lexidas** and **Fourie**. Great battling and both gave enough space.

Turn 12 was a nightmare for some. Some so afraid they turned in the corner with three hands on the wheel and the right foot above their heads. Others went flying like it was nothing to worry about.

We are looking forward to the next races. Next week it is Bahrain on the calendar. Also with a tricky first corner.

A couple of players are starting the season a few weeks later. **SavvasGreece** is returning on the grid and **MarkedCarp** is back on February 2nd. **Huub's** twin brother **Stef** is joining next week in the McLaren. Also the hopes on **Cringy** are there to give **Timo** the challenge to maintain the lead on the board.

GA LegendZz is a driver from the UK we found in an Unranked match. He will race from next week in the Racing Point. We have to find out his pace and drivers style.

See you next week! Thank you for reading.

Details per lap

L1-T1 **SC** **WTZFLEX** did a suicide action at this first turn. He almost eliminated himself and others. Bad start for him. Apologies to all and a license point on his sheet.

Jerry Jarvinen spun on **DenJef** caused by bad connection. Jerry and we decided he will race again if he has proper connection. It just doesn't work at his place where he lives at the moment.

L4-T3 **RStoffie** crashed on **WTZFLEX**. No further action as this is sorted out between the two drivers. It also concerned a guest driver.

L6-T12 **VSC** **RStoffie** crashed the Haas and retired.

L8-T12 **SC** Stryher copies this. Also a DNF for him.

L13-T3/4 Little touch between **Berry** and **Deauj**. Unavoidable for **Berry** in our opinion.

L13-T12 **VSC** Corner of death this race. **lepovich** (the driver with the Scorpion picture) is the third driver that crashes the car.

L14 During VSC **Deauj** lowers too much speed giving **Gurbe** problems and wing damage. His race was lost because of it. This kind of situations are almost a weekly discussion. Keep the pace during VSC and lower Delta. License point for **Deauj** for this action.

L14-T15 **DHR Graat** caused a chain reaction on **WTZFLEX**, **Lando** and **Lexidas**. This is worth a warning. Had big impact.

L26-T15 **DenJef** misjudged his braking point and touched Timo. He spins and Timo is gone.

L28-T1 From the clip of **Samuel** we see he hits **Fourie**. It is hard to blame someone. It is just a tricky corner. And if we see the clip we think **Samuel** could not do anything different.

L28-T10 **WTZFLEX** spun the car and hits the wall.

Details per driver / team *Note: not everyone will be mentioned.

GurbeGaming

Great restart after the first SC. Overtaking two drivers in a flash. If some incidents did not happen a podium could be there.

Stryher

Hard times for him in Melbourne. Better luck in Bahrain next week. We believe in strong races in the future!

DenJef and Timo

Almost the whole race **DenJef** was in front. In almost the last lap **Timo** overtook him. Great race both!

EconomicBerry (on behalf of Jakes)

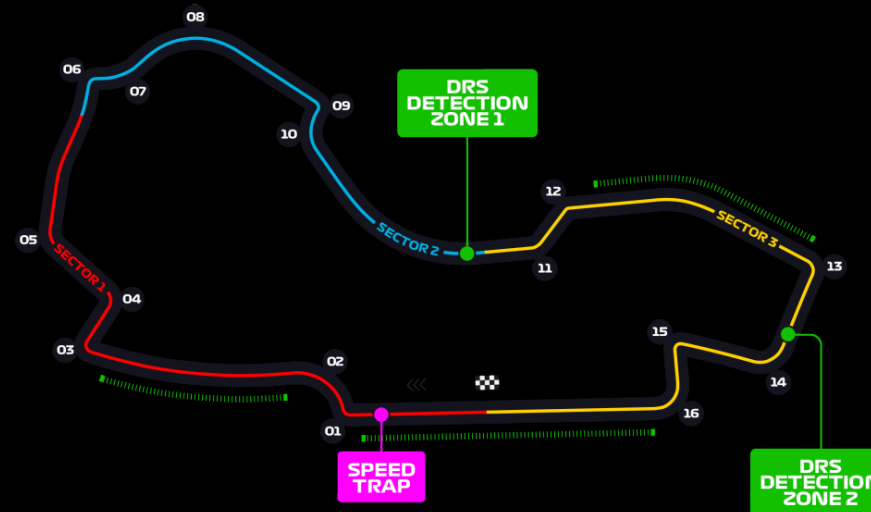

Strong race. Only one error in L20 where the wall got scratched. Your strategy delivered the fastest lap in this race. Well done.

LandoFanClub

That was a unlucky pit entry. Did not put that clip on our channel, but I did see it with one eye closed. Better luck next race **Lando**!

Lexidas and Huub

Huub got his driver of the award by the game. Since **Lexidas** had the same performance on the board, but he had no time penalties. On this track that is an achievement. So he got the award from us. Well done both!
