Session summary

The streets of Monaco. The circuit where the safety car's engine is always running.

A good quality session in terms of connection. The times set in Qualy were good. Like Jef said, you seem to have a good understanding of this track. Now let's try for purple.

Even though we want to drive professionally and neatly, we have to understand that most of us are just home, garden and kitchen drivers. With all due respect.

With that said, wing damage is inevitable on this track. By braking too late, braking too early, errors of judgment or just ignorance. That is why not all incidents will be highlighted, but only the most important.

Despite this, we are happy that the overall quality of racing is good.

In the next circuit in Baku it is not quite the same, but it is in sector 2.

So pay good attention to each other and everything will be fine!

Important note:
Reset to track is allowed in Qualy, not in the race!

Details per lap

L1-T10 **Huub** hits the back of his car and spins. Wants to re-join and gets a 3sec penalty by the game. Even that it looks like a strange decision, you did cut that corner. The re-joining had to be done in different way. Just a unlucky moment.

L2-Tunnel **SC** **Fourie** crashed in the tunnel section. DNF.

L10 **VSC** The reason of this VSC is unknown. During the VSC **Berry** got a DNF in T12.

Denjef served a DT after the VSC.

L12 **MarkedCarp** retired the car in the pit.

L17-T8 **SC** **AWRL Kevin** crashed the car. DNF.

L22-T6 **L23 SC** **DHR Graat** got stuck in the wall. Game bug.

L34-T2 **DenJef** and **Huub** side by side. **Denjef** not able to give more room. Also scratching the wall (no damage). This is a race incident as the overtake moment was there.

Details per driver / team *Note: not everyone will be mentioned.

Escaapo
Strong races ended in tears in L31. Great race dude. Deserved a better ending! For the incident at the start last week in Spain we note a warning on your sheet. Thank you for the feedback on this incident.

Lexidas and DHR Graat
Good session from Mercedes. Second place for **Lexidas**. Great job. Strong comeback **Graat**. Great team.

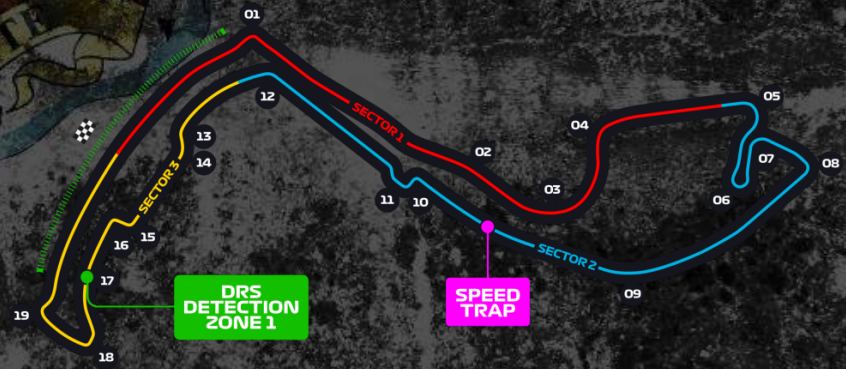

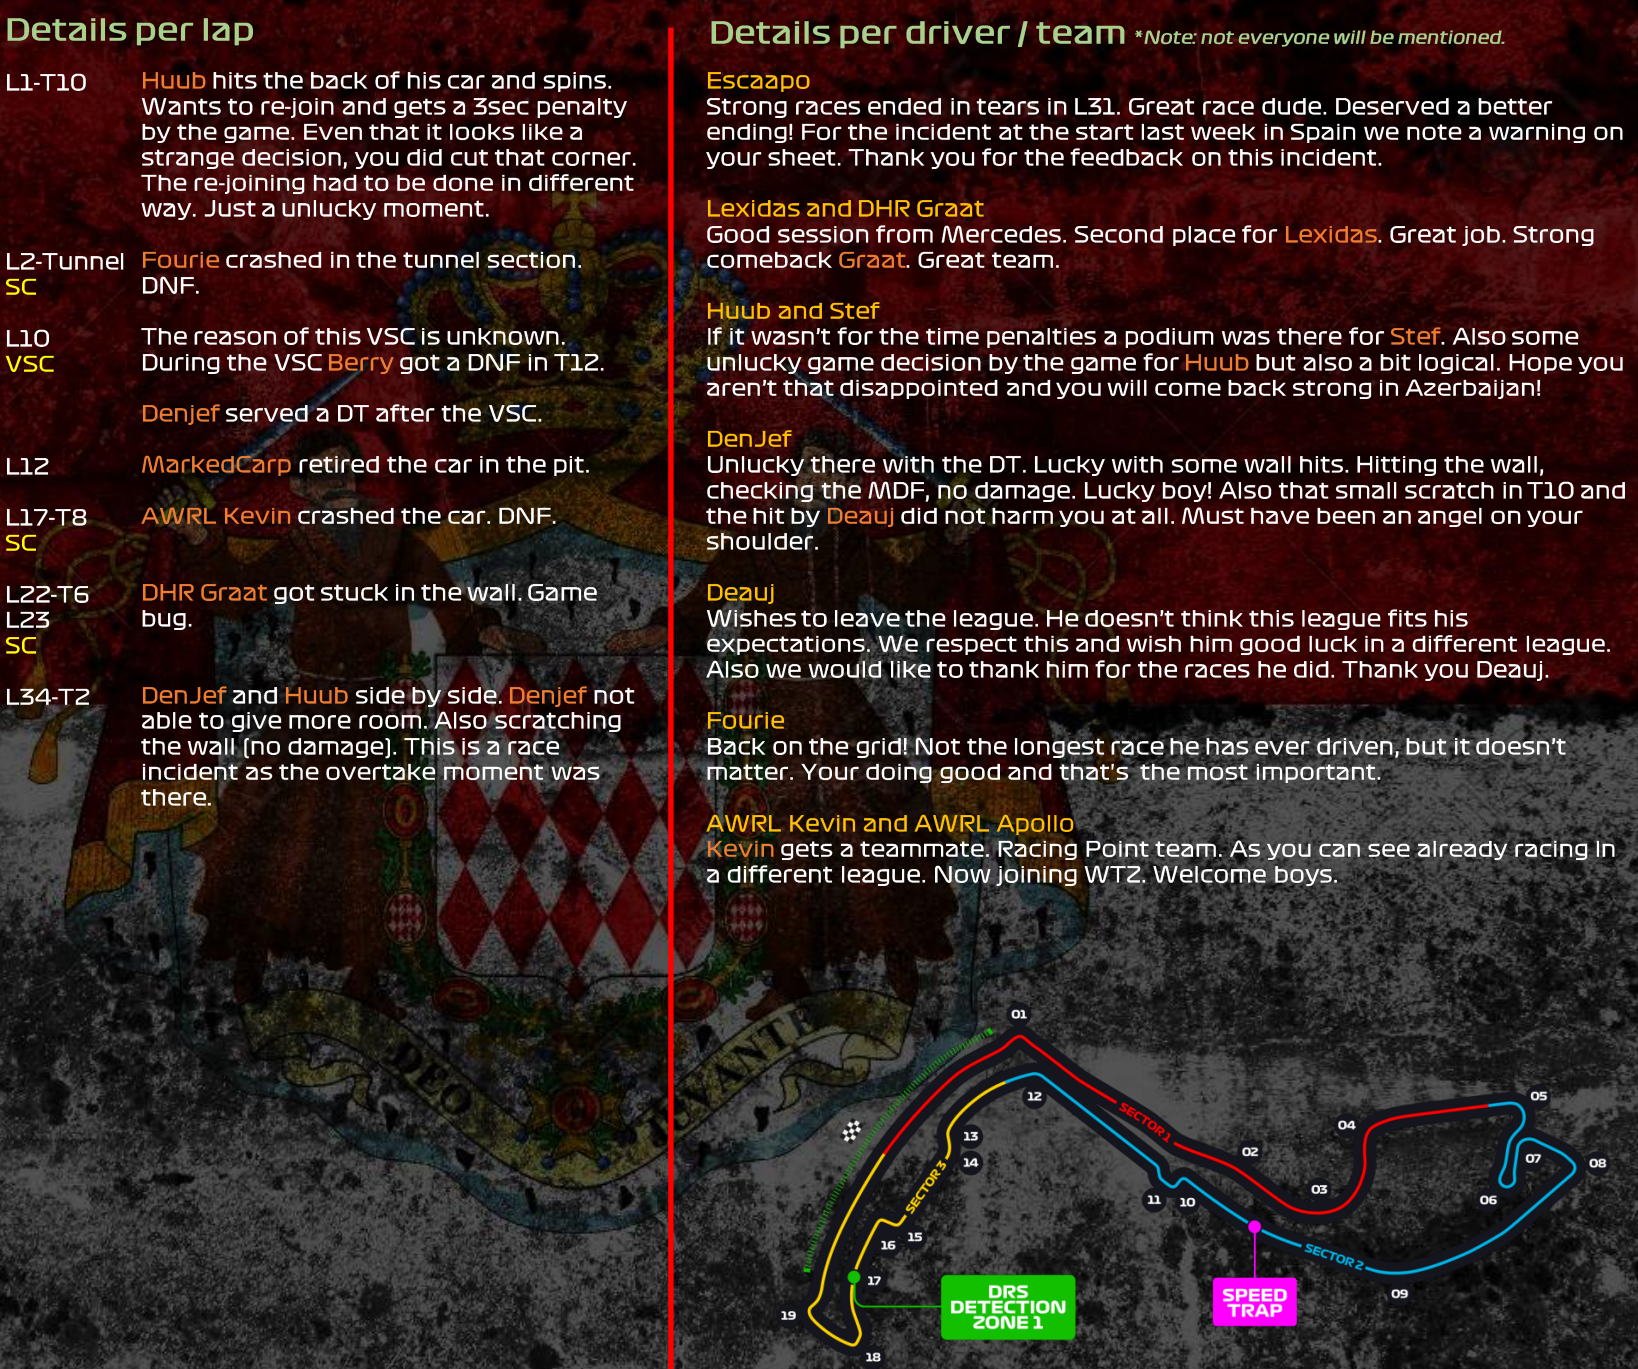

Huub and Stef
If it wasn't for the time penalties a podium was there for **Stef**. Also some unlucky game decision by the game for **Huub** but also a bit logical. Hope you aren't that disappointed and you will come back strong in Azerbaijan!

DenJef
Unlucky there with the DT. Lucky with some wall hits. Hitting the wall, checking the MDF, no damage. Lucky boy! Also that small scratch in T10 and the hit by **Deauj** did not harm you at all. Must have been an angel on your shoulder.

Deauj
Wishes to leave the league. He doesn't think this league fits his expectations. We respect this and wish him good luck in a different league. Also we would like to thank him for the races he did. Thank you Deauj.

Fourie
Back on the grid! Not the longest race he has ever driven, but it doesn't matter. Your doing good and that's the most important.

AWRL Kevin and AWRL Apollo
Kevin gets a teammate. Racing Point team. As you can see already racing in a different league. Now joining WTZ. Welcome boys.
